The Mill		Singapore				industry day
Dassault Systemes (2009)	workshop	Singapore				industry day
Alioscopy (2013)		Singapore			collaboration	

- Collaboration between ANDA and Lucasfilm Industrial Light and Magic Singapore**

What a great experience it was to witness students from Film, Producing, and the Animation and Digital Arts departments working together on such a high quality and important project. The Lucasfilm team and ANDA faculty were very excited by the outcome of every one's effort and interest in this project. This visual effects collaboration between digital effects artists from Lucasfilm's ILM - Industrial Light And Magic, <http://www.lucasfilm.com/divisions/singapore/> - is the first of it's kind for both ANDA and Lucasfilm - Industrial Light and Magic Singapore. The two days were extremely smooth and productive on every level. We are actively working on processing the digital footage that will be available on line for students visual effects assignments.

'The Making of project Carrot Cake' (named after the famous carrot cake from the cafeteria) is on Vimeo. <http://vimeo.com/56895113> password : lucasnyu - Footage starts at 1:15.
